MOTORCOACH Basecoat

A Rich History

In 1866 Henry Sherwin and Edward Williams formed the Sherwin-Williams Company. By the early 1920s, the company was the largest manufacturer of coatings in the nation. Today, our global footprint includes sales and distribution in over 75 countries world-wide.

Our expertise in paint and coatings is unmatched. Sherwin-Williams products are used today on Architectural, Residential, Marine, Manufacturing, Automotive, RV, Aerospace and many other applications. For 144 years, The Sherwin-Williams Company is determined to lead our industry and to manufacture and market innovative products of superior quality. These products have, and continue to revolutionize the coatings industry. ASK how Sherwin-Williams can bring this wealth of expertise to your business!

Segment Expertise

Sherwin-Williams Automotive Finishes develops, manufactures and distributes the highest quality coatings in the market today. Sherwin-Williams also provides superior service through our field organization, branch network, design engineers and training facilities. Along with service, the product lines offered deliver outstanding performance, appearance and have complete solutions for any RV Refinishing and Manufacturing needs. Sherwin-Williams Automotive Finishes possesses the segment expertise that will allow your business to become more productive and profitable. Just ASK Sherwin-Williams how!

Motorcoach Basecoat was created specifically for the RV industry. Knowing these vehicles will undergo severe weather and road conditions, Motorcoach Basecoat has excellent chip resistance. It is formulated to ensure excellent chemical adhesion to a variety of substrates, including fiberglass.

In order to meet the wide range of designer's needs, an extensive palette of solid, metallic and pearlescent colors are readily available. Motorcoach Basecoat is the ideal paint system for creating multiple color schemes, graphics, striping and other designs on today's customized and high-end RVs.

Product Features of Motorcoach Basecoat:

- 2K Urethane Basecoat System
- Fast Production and Dry Times
- Designed for Multi-color/Striping Paint Schemes
- MACT Compliant: Ready-to-Spray (RTS) HAPs Levels Less than 1.34lbs/HAPS per lbs solids
- Superior Adhesion and Chip Resistance, Especially Compared to Competitive 1K Basecoat Systems

Service and Support:

- Standard Operating Procedures, Process Controls and Quality Tracking
- Lean Production Analysis Including Audits and Solutions
- Color Formulation and Documentation
- Engineering Design Capabilities
- Equipment Recommendation Service
- Inventory Control
- On-Site Technical Service
- Marketing Support
- Training and Certification
